Re: Winnebago Reclamation Service/Pagel's Pit CERCLA Site

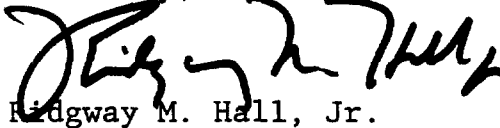

Dear Mr. Bartelt:

As you know, on October 15, 1984, EPA proposed the addition of 238 new sites to the CERCLA National Priorities List, 49 Fed.Reg. 40320, et seq. This list included the so-called Pagel's Pit site in Group 6, about which we have previously corresponded.

As soon as our client, William Charles Ltd., learned of the inclusion of this site, they decided to commission a comprehensive sampling and analysis program with respect to the groundwater to be conducted by Warzyn Engineering Inc. of Madison, Wisconsin. Warzyn indicates, however, that such a study will take approximately four months. We therefore have written to EPA in Washington requesting a 60-day extension of the comment period to enable us to complete the study and furnish it to EPA in time for EPA to consider it in connection with any final decision on whether or not to keep Pagel's Pit on the List.

In light of our prior correspondence, I wanted you to have a copy of that letter, and therefore I enclose a copy herewith.

Sincerely,

  
Ridgway M. Hall, Jr.

Enclosure
